DCC SUN SENSOR

Revision No.
Date
Part No. 1810956

Description: The Decorator Comfort Control enables any motor, or group of motors on the SDN to provide shading from the sun automatically and conveniently. The DCC sun sensor continually monitors sun intensity, triggering the Smart Switch send the window treatment to any programmed position . The summer/winter switch allows for maximum shading in the summer and maximum sunlight in the winter.

Connectivity: The DCC connects to a dry contact input on the back of a Smart Switch by means of a modular cable. When the sun intensity exceeds the level set on the DCC the smart switch will send the command associated with that contact.
