SMART SWITCH

Revision No.
Date March 1, 2008
Part No. 1810827 & 1810828

Description: The Smart Switch is a control device which outputs the SDN protocol over RS-485, providing digital control of the Somfy Digital Network. The Smart Switch allows the SDN to function as a stand alone natural lighting control system and can be fully customized through the SDN Smart Switch Configuration Software. The Smart Switch is available in 3-button and 6-button versions which can be located anywhere on the Somfy Digital Network. Each dry contact is mapped to it's corresponding button. Contacts not associated to any button will output the programmed command onto the network.

Specification:

- Buttons are fully programmable
- Standard Decora style
- Mounts in a single gang box
- 8 dry contact inputs for system integration*
- IR compatible
- Warranty: 5 years

*** Requires 9 pin terminal block
catalog # 55000339**
